## ESFR-25 Dry Sprinkler

Efficient and dependable  
fire protection for  
commercial cold storage

Operates in  
extreme cold

Simple installation with  
ceiling-only design

FM Approved

Cost efficient,  
minimizes downtime

Reduces condensation  
and ice buildup

Flexible application  
and compatible design

The ESFR-25 Dry-Type Pendent Sprinkler enhances fire suppression for commercial refrigerated and frozen storage, offering efficient, FM Approved protection.

Designed for temperatures as low as -60°F (-51°C) and heights up to 50 feet, its ceiling-only, lower-pressure design increases flexibility by reducing the need for a fire pump and simplifying installation compared to traditional in-rack systems.

Say goodbye to concerns about obstructions and wear damaging in-rack sprinklers - experience a simpler, cost-effective solution.

The ESFR-25 Dry-Type Pendent Sprinkler is unique in offering both threaded and grooved connections on the same device and providing versatility for various cold storage needs.

With a nominal K-factor of 25.2, this early suppression, fast-response sprinkler ensures consistent performance and offers a range of temperature ratings and barrel lengths, along with an insulating seal assembly kit to minimize condensation and ice buildup.

Experience efficient fire protection for commercial cold storage.
